VERSION INFORMATION

Drobo Firmware: Version 3.5.3 [11.48.84658]

KEY HIGHLIGHTS

This is the first firmware release for the Drobo 5C

Key Features

- Supports 64TB volume size
- Provides USB-C connector interface
- Supports backup on a second volume

KNOWN ISSUES

Mac Specific

Symptom: Non-destructive repartitioning is not supported.

Condition: In Mac OS X 10.5 and later, Disk Utility allows you to repartition a volume without losing the data on it. Drobo volumes do not support this functionality and should not be repartitioned once data has been placed on them.

Workaround: Copy your data onto another drive and use Drobo Dashboard to reformat your Drobo device's volume to a smaller size.

BEST PRACTICES

In accordance with industry best practices, you should always backup your data before any firmware upgrade. For more information, please visit drobo.com/support.

Make sure that you keep all software up to date. This includes Drobo Dashboard, which as of this writing the latest release is 2.8.3.

RELATED TECHNICAL DOCUMENTATION

Current Drobo technical reference materials are available on the Drobo Support Website (myproducts.drobo.com/support).
