## VERSION INFORMATION

---

Drobo Firmware: Version 1.2.0 [6.90.71861]

## KEY HIGHLIGHTS

---

This is a new release of Drobo firmware for Drobo B1200i.

- Increased the capacity of the storage pool from 32TB to 128TB.
- Users can now create volumes as large as 64TB on current supported platforms.
- Added support for higher drive capacities (e.g. 6TB).
- Improved relayouts to be up to 8x faster.
- Improved collection of Diagnostic files under heavy loads.
- Fixed a crash caused when BitLocker or SyncToy were used.
- General stability and speed improvements.
- Better handling of bad disks

## KNOWN ISSUES

---

### General Issues

None

## BEST PRACTICES

---

In accordance with industry best practices, you should always backup your data before any firmware upgrade. For more information, please visit [drobo.com/support](http://drobo.com/support).

Make sure that you keep all software up to date. This includes Drobo Dashboard, which as of this writing the latest release is 2.6.4.
